

Microservice Test Types.

A (rather ugly) MSDO Cheat Sheet
By Henrik Bærbak.

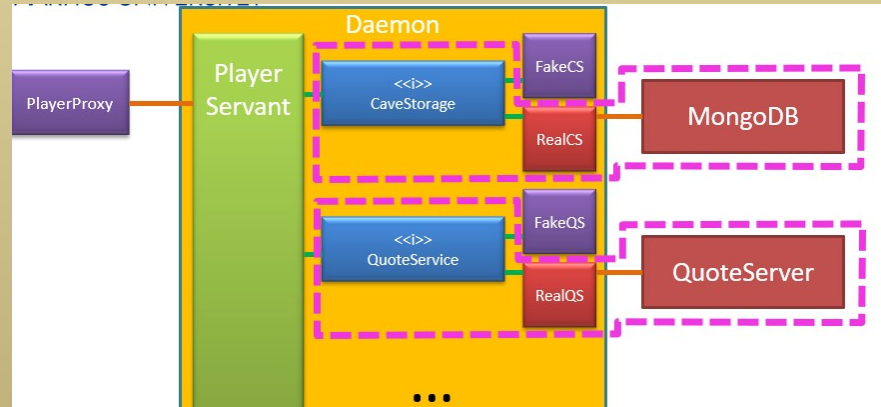

Service Test (in-process) [Fowler: Component Test]
Service tested as a system, DOUs are test doubles.

Service Test (out-of-process) [Fowler: no equivalent]
Service tested as a system, some DOUs are out-of-process test doubles (like mountebank services)

(no Newman eq.) **[Fowler: Integration Test]** **[Bærbak: Connector test]**
Connectors/drivers to external DOUs are tested.

Consumer Driven Test [Fowler: Contract Test]
Raw IPC protocols to external DOU are tested.
