

SWEA Iteration 8: Frameworks

<<Group name>>
Computer Science, University of Aarhus
8200 Århus N, Denmark
<<Names>>

<<Date>>

1 Frameworks

1.1 Framework characteristics

FRS Section 32.2 outlines several characteristics of frameworks. Our HotStone match/do not match in these respects [Unfold your analysis].

1.2 Examples of frozen and hot spots

[Insert and explain code fragments from your HotStone system that defines frozen spots and also insert and explain code fragments that act as hot spots in the HotStone framework]

1.3 TEMPLATE METHOD examples

[Insert code fragments that follow the TEMPLATE METHOD pattern]
[Discuss how this demonstrates the *inversion of control* property]

2 Backlog

The following features and requirements are still not implemented in our HotStone:

- ...
- ...
